Submission ID: 160067

Timestamp: 6/1/2026 3:58 AM UTC

Name: Andrew Rhoden

Challenge ID: 118

Challenge Title: Disguising a Dastardly Deed with Disappeared Data
[NG]

This report has not been published by a curator. Experience Cyber cannot vouch for its accuracy.

Scenario

One of our temporary employees, Rob, has been terminated under suspicion of exfiltrating sensitive company data onto the internet. Some possibly incriminating evidence has been seized from the computer Rob worked at. This data was encrypted by Rob before his account was deactivated and he was escorted off company grounds. I need this data to be unencrypted for analysis and you're going to be the one to do it for me.

Duration

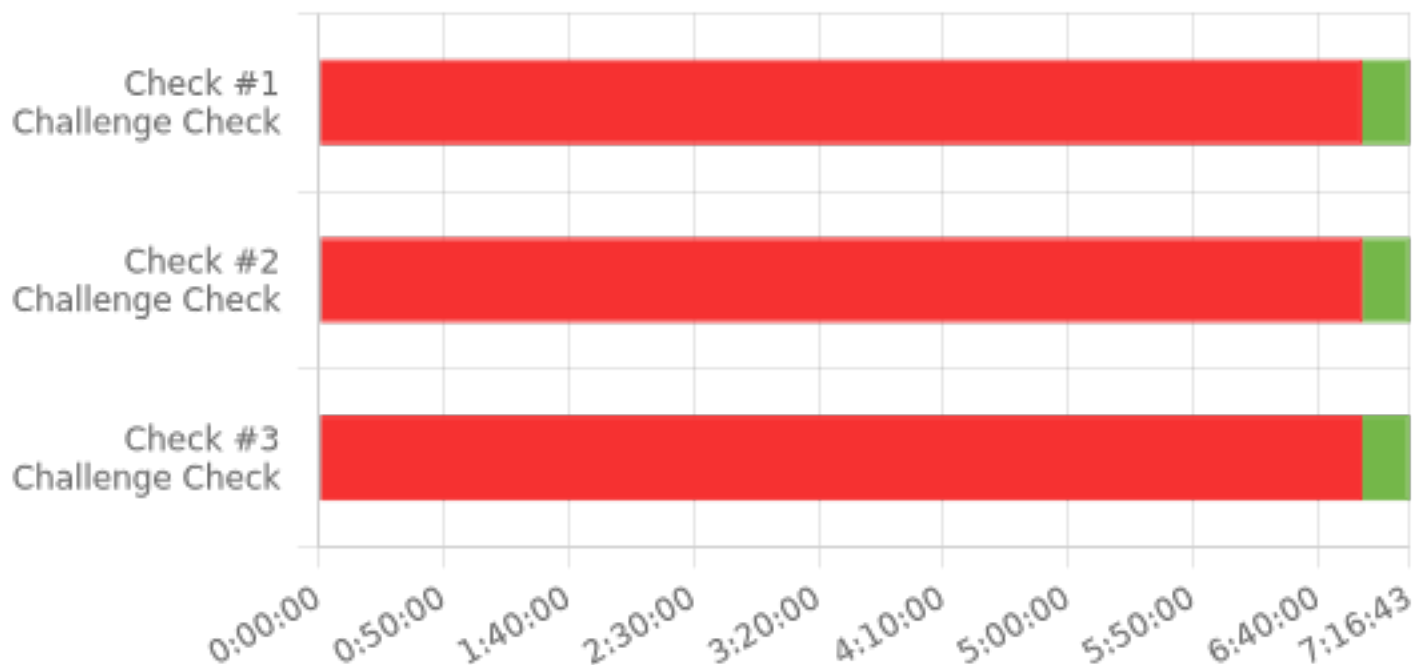

7:16

Full Check Pass

Full: 4/4

Final Check Details

- ✓ Check #1: Unencrypt 2EWX83.txt
- ✓ Check #2: Unencrypt astral.jpg
- ✓ Check #3: Unencrypt fog.jpg
- ✓ Check #4: Unencrypt prince.jpg

Element

Cyber Enablers

Work Role

Forensics Analyst

DCWF Tasks

- 482: Decrypt seized data using technical means.

Knowledge, Skills, and Abilities

- 24: Knowledge of concepts and practices of processing digital forensic data.
- 25A: Knowledge of encryption algorithms, stenography, and other forms of data concealment.
- 61: Knowledge of incident response and handling methodologies.
- 90: Knowledge of operating systems.
- 287: Knowledge of file system implementations (e.g., New Technology File System [NTFS], File Allocation Table [FAT], File Extension [EXT]).
- 386: Skill in using virtual machines.
- 888: Knowledge of types of digital forensics data and how to recognize them.
- 908: Ability to decrypt digital data collections.
- 1095: Knowledge of how different file types can be used for anomalous behavior.
- 1100: Skill in identifying obfuscation techniques.
